(54) Title: COMMUNICATION SYSTEM WITH SECONDARY CHANNEL REBROADCASTING WITHIN A LOCAL AREA NETWORK

(57) Abstract: A system (10) of distributing electronic content includes a network operations center (214) forming a composite broadcast signal having digital electronic content during a vertical blanking interval of a primary channel signal. A content delivery system (210) receives the composite broadcast signal from the network operations center and broadcasts the composite broadcast signal. A base station receives the composite broadcast signal forms a wireless local area network (228). The base station (220) rebroadcasts at least a portion of the composite signal as a rebroadcast signal using the wireless local network. A user appliance (232) is positioned within the local area network and receives the rebroadcast signal.

A. CLASSIFICATION OF SUBJECT MATTER
 IPC 7 H04N7/10 H04N7/16 H04N7/088

According to International Patent Classification (IPC) or to both national classification and IPC

B. FIELDS SEARCHEDMinimum documentation searched (classification system followed by classification symbols)
 IPC 7 H04N

Documentation searched other than minimum documentation to the extent that such documents are included in the fields searched

Electronic data base consulted during the international search (name of data base and, where practical, search terms used)

EPO-Internal, WPI Data, PAJ

C. DOCUMENTS CONSIDERED TO BE RELEVANT

Category *	Citation of document, with indication, where appropriate, of the relevant passages	Relevant to claim No.

 Further documents are listed in the continuation of box C. Patent family members are listed in annex.

* Special categories of cited documents :

- *A* document defining the general state of the art which is not considered to be of particular relevance
- *E* earlier document but published on or after the international filing date
- *L* document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- *O* document referring to an oral disclosure, use, exhibition or other means
- *P* document published prior to the international filing date but later than the priority date claimed

- *T* later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- *X* document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- *Y* document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- *&* document member of the same patent family
